

Leonardo Mesquita

Data Engineer | Power BI | SQL | Dashboards & KPIs

Ceará, Brasil | [+55 \(85\) 99977-4142](tel:+5585999774142) | contatoleonardo@gmail.com | <https://srmesquitaa.github.io/> | [linkedin.com/in/leonardomesquitaa](https://www.linkedin.com/in/leonardomesquitaa)

PROFESSIONAL SUMMARY

Data engineer with experience in KPI structuring, strategic Power BI dashboard development, and Data Warehouse data modeling. Translates stakeholder needs into practical analyses using SQL and Python for data extraction and transformation. Proven track record supporting executive decision-making with clear, reliable, and actionable business indicators.

PROFESSIONAL EXPERIENCE

BI Analyst | Amel's Conceito (Hapvida) | January 2026 - Present

- Designed KPI frameworks and strategic Power BI dashboards using DAX and M Language, consolidating sales indicators for monitoring by executives and supervisors.
- Modeled data in a Data Warehouse (BigQuery) using a layered architecture (Bronze/Silver/Gold), ensuring quality and consistency of data delivered to business units.
- Extracted, transformed, and analyzed data via SQL and Python (Pandas), automating production ETL pipelines with delivery via Google Drive API and monitoring via Telegram API.
- Achieved an 83% increase in data capture volume with 100% integrity by replacing a manual process with an automated extraction engine featuring structured logging.
- Translated stakeholder needs into practical queries and reports, with weekly executive meetings to present insights without technical jargon.
- Integrated data from multiple sources via APIs (Google Drive, Telegram, BigQuery, CRM) for real-time data ingestion and distribution.

Junior Data Analyst | Grupo Vilarouca | July 2024 - February 2025

- Developed strategic Power BI dashboards focused on performance, patterns, and trends for the Marketing and Logistics teams.
- End-to-end ETL with Python and Selenium: data extraction, consolidation, and quality assurance for analytical reports.
- Exploratory analysis to identify patterns and align metrics with strategic KPIs across business areas.
- Collaborated with cross-functional teams across Marketing, Logistics, and Sales.

TECHNICAL SKILLS

BI & Visualization

Power BI (DAX, M Language, modeling, performance, publishing), Google Sheets, Advanced Excel, Google Analytics

Databases & SQL

SQL (complex queries, optimization), BigQuery, relational and dimensional modeling, Data Warehouse, Data Lake

ETL & Data Engineering

Python (Pandas, Selenium, Requests), production ETL pipelines, API integration, structured logging, data quality control

Cloud & Infrastructure

AWS EC2, Google Cloud (BigQuery), Google Drive API, Linux/Windows cron scheduling

Version Control

Git / GitHub

EDUCATION

Technology Degree in Systems Analysis and Development | Expected: 2028

Uniateneu - Fortaleza, CE

LANGUAGES

Portuguese: Native | English: Advanced (technical documentation reading and professional communication)
